EXPERIENCE: 1.5 YEARS

PROFILE

Full-Stack Software Engineer, UI/UX & Graphic Designer, and Founder with experience building production-ready web and mobile applications while creating complete product identities, marketing campaigns, advertisements, social media creatives, packaging, and branding. Skilled in taking products from idea to launch by combining software engineering, AI, and creative design to deliver polished user experiences and high-impact digital products.

EXPERIENCE

Founder & Full-Stack Developer — Krishnaite Academy

Designed, architected, developed, and deployed a complete premium online learning platform from scratch. Took full end-to-end ownership of product architecture, database design, backend APIs, responsive UI, SEO optimization, and production deployment using React, TypeScript, Node.js, PostgreSQL, Supabase, and Tailwind CSS. Built core features including authentication and payment integration.

Founder & Full-Stack Developer — Mentozy

Built an end-to-end mentorship platform connecting mentors and learners. Executed complete product ownership including database design, backend APIs, responsive frontend, and production deployment. Developed an authentication system, booking system, comprehensive dashboards, and integrated seamless video calling capabilities.

Android Application Developer — Focus

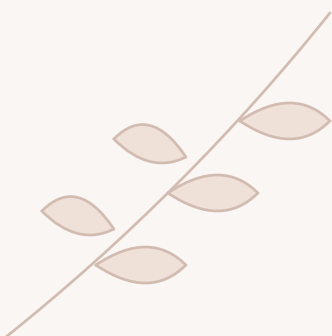

Built a productivity application focused on distraction blocking and parental monitoring. Integrated Firebase for real-time synchronization and backend services. Developed robust features including app blocking, study sessions, parent monitoring insights, subscription management, and extensive accessibility integration.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Expected 2028

Birla Institute of Technology and Science (BITS Pilani) — Online Degree

SKILLS

Development: TypeScript, JavaScript (ES6+), Python, Java, React.js, Next.js, Node.js, FastAPI, SQL, Tailwind CSS
